

# Pawtucket Water Supply Board

## Requirements For Detailed Design Plans

The applicant shall include with the main extension application, two (2) sets of detailed plans prepared by a registered professional engineer in the State of Rhode Island in accordance with the following requirements:

1. Each plan sheet shall be numbered and have a small title block in the lower right-hand corner that includes the project name, city, state, developers name, date, and scale.
2. Drawing scale of plans shall be 1 inch = 40 feet (min)
3. All plan views shall show a "North" arrow.
4. All footprints of permanent structures ( w/ street address noted if applicable) shall be shown for all existing adjacent structures and all proposed structures.
5. Each individual lot shall be referenced with the tax assessor's plat number, lot number and owner's name and address.
6. All existing and proposed street R.O.W. boundaries, property line boundaries, curblines, pavement edges and other underground utilities shall be shown.
7. The locations and sizes of all proposed (and existing) water main, valves, hydrants, blow-offs, services and other appurtenances shall be shown.
8. All proposed water works material items shown on the plans shall be in conformance with the current PWSB material specifications and shall be listed along with a quantity estimate for each item.
9. The applicant shall include with their application a completed "Design Check List for Project Review" for PWSB project review.
