1.4 CHARGES

1.4.1 Water: Charges for water shall be based on metered consumption by the premises. Water consumption shall be measured in cubic feet and billed in units of 100 cubic feet (HCF) in accordance with the tariffs.

1.4.2 Customer Service Charge: A customer service charge shall be assessed against all active accounts and shall be calculated in proportion to the size of the meter (s) on the service in accordance with the tariffs.

1.4.4 Other Charges: Charges for merchandise, construction services, meter repairs, and other special services shall be billed in accordance with the appropriate provisions of the rules and regulations and applicable tariffs.

4.1 CONSTRUCTION SERVICES

4.1.1 Application: Contractors, builders, and others requiring water for construction purposes shall make application for a temporary service and shall thereafter be subject to the same rules and regulations as permanent customers.

4.1.2 Meters and Backflow Prevention: Appropriately sized meter and backflow prevention device shall be installed on the temporary service, in a protected location provided by the applicant.

4.1.3 Payment: The applicant for a temporary service shall make payment in advance of an application/service installation charge which will cover the PWSB's costs in installing the service, plus a deposit sufficient to cover the cost of the water meter, backflow prevention device and the estimated cost of the water to be used through the temporary service.

4.1.4 Excessive Consumption: If, at any time, the cost of the water used by the applicant exceeds the amount deposited for the cost of water, the applicant will be required to deposit additional sums to pay for the actual consumption and estimated additional use.

4.1.5 Refund: Following completion of the work, upon the return of the meter and backflow prevention device and request of the applicant, the PWSB shall refund any unused portions of the deposit.

4.2 HYDRANT SUPPLIES

4.2.1 Special Permit: Temporary service supplies from fire hydrants shall be made only under special permit of the Chief Engineer and shall be subject to all conditions contained in such permit.

4.2.2 Meter and Backflow Prevention: All hydrant services shall have an appropriately sized meter and backflow prevention device set by the PWSB. The applicant shall provide a secure location for the meter.

4.2.3 Payment: The applicant shall pay, in advance, an application charge as well as a deposit of sufficient amount to cover the cost of the water meter and backflow prevention device and the estimated water which will be used.

4.2.4 Refund: Upon request of the applicant and the return of the meter and backflow prevention device in good condition, the unused portion of the deposit shall be refunded.

4.2.5 Swimming Pools: Swimming pools shall not be filled from fire hydrants under any circumstances.
